

5× Passive Lysis Buffer

P1375510

Storage: Store at -20°C.

Product Description

5× Passive Lysis Buffer is a concentrated cell lysis buffer that is designed for use with Renilla Luciferase Assay Kit (R598308) and Firefly and Renilla Luciferase Assay Kit (D829607). These kits are supplied with sufficient 5× Passive Lysis Buffer to perform the stated number of assays with cells grown in 96 – 24 well plates. 5× Passive Lysis Buffer is sold separately for use with the kits when more lysis buffer (e.g. >100 uL/well) is required.

Protocol

1、Preparation of cell lysates

1. Preparation of 1× Passive Lysis Buffer 1. Prepare 1× Passive Lysis Buffer by adding 1 volume of 5× passive lysis buffer to 4 volumes of dH₂O and mixing well. 1× passive lysis buffer may be stored at 4°C for up to one month.

2、Lysis of Cells Cultured in Multiwell Plates

1. Remove the growth medium from the cultured cells and gently add a sufficient volume of phosphate buffered saline (PBS) to wash the surface of the culture vessel. Add 1× passive lysis buffer using the volume recommended below for each type of well:

Wells/plate Lysis buffer/well	
6 well	500 uL
12 well	250 uL
24 well	100 uL
48 well	65 uL
96 well	20 uL

2. Place the culture plates on a rocking platform or orbital shaker with gentle rocking/shaking to ensure complete and even coverage of the cell monolayer with 1× passive lysis buffer. Rock the culture plates at room temperature for 15 minutes.

Note: Cultures that are overgrown are often more resistant to complete lysis, and typically require an increased volume of passive lysis buffer, extended treatment period, and/or scraping cells off the culture plates to ensure complete lysis.

3. Transfer the lysate to a tube or vial. Optional: the lysate can be cleared by centrifugation for 30 seconds at top speed in a refrigerated microcentrifuge and transferred into a new tube. Place at 4°C for until ready to assay. Store lysates at -20°C or -70°C if assay will not be performed on the same day.

4. To assay lysates with Renilla Luciferase Assay Kit (R598308) or Firefly and Renilla Luciferase Assay Kit (D829607), follow the assay protocols provided with the kit.
