

Artificial Colonic Fluid

Cat. No.: A1509633 | Pack size: 500 mL | Storage: Room temperature

Overview

Artificial Colonic Fluid is a solution formulated to simulate the composition and pH value of natural colonic fluid. It mainly consists of phosphates, ammonia water and other components. This reagent is exclusively intended for research purposes and not applicable for clinical diagnosis or any other uses.

Operating Procedures (For Reference Only)

Perform the operation in accordance with the specific experimental requirements.

Precautions

1. Artificial Colonic Fluid is a non-sterile solution. If sterility is required, sterile filtration with a 0.22 μm filter membrane should be carried out.
2. Store Artificial Colonic Fluid in a sealed container. Once opened, it should be used immediately; otherwise, its effectiveness will decrease.
3. Please use the reagent as soon as possible after opening to avoid affecting the results of subsequent experiments.
4. For your safety and health, wear a lab coat and disposable gloves during operation.

Specifications

Attribute	Value
Specifications & Purity	BioReagent
Stability And Storage	Store at room temperature long term (12 months).
Storage Conditions	Room temperature
Shipped In	Normal
Grade	BioReagent

Contact & Global Offices

Whether you have a technical question, need help with a quotation, or want to inquire about an order, our regional teams are ready to assist. Please contact the office for your region; for general inquiries, the North American office is the corporate primary.
