

TAE Buffer (50×, RNase Free)

Cat. No.: T1518779 | Pack size: 500 mL | Storage: Room temperature

Overview

Tris-Acetate-EDTA Buffer (TAE) is a commonly used nucleic acid electrophoresis buffer. The composition of 1× TAE working solution is: 40 mM Tris-acetate, 1 mM EDTA (pH 8.0).

TAE Buffer (50×, RNase Free) is a 50-fold concentrated solution prepared with 0.1% DEPC-treated water. It primarily contains 2 M Tris-acetate, 50 mM EDTA, and other components. It is specifically designed for RNA electrophoresis. Before use, dilute 50-fold with DEPC-treated water to obtain a 1× working solution.

This reagent is for research use only. Not for use in diagnostic procedures or other purposes.

Procedure (For Reference Only)

Dilute the product to a 1× working solution with DEPC-treated water before use.

Notes

- If the single-use volume is small, it is recommended to aliquot the reagent before use.
- Strictly avoid RNase contamination throughout the entire experimental procedure.
- Please wear laboratory appropriate attire and disposable gloves during operation.
- Use the reagent as soon as possible after opening and keep it sealed to avoid affecting experimental results.

Specifications

Attribute	Value
Synonyms	Tris-Acetate-EDTA Buffer (50×, RNase Free) 50× TAE Buffer (RNase Free) Tris-Acetate-EDTA Electrophoresis Buffer (50×, RNase Free)
Specifications & Purity	BioReagent, Suitable for molecular biology, for NA electrophoresis, RNase free, 50×
Stability And Storage	Store at room temperature long term (12 months).
Storage Conditions	Room temperature

Attribute	Value
Shipped In	Normal
Grade	BioReagent, for NA electrophoresis, RNase free, Suitable for molecular biology

Contact & Global Offices

Whether you have a technical question, need help with a quotation, or want to inquire about an order, our regional teams are ready to assist. Please contact the office for your region; for general inquiries, the North American office is the corporate primary.
