

Insect Fixative (Carl's)

Cat. No.: C1525473 | Pack size: 500 mL | Storage: Room temperature

Overview

This product is mainly composed of formalin, glacial acetic acid and absolute ethanol, among others. It has a slight pungent odor and serves as an excellent insect-preserving solution. It is commonly used to kill and preserve small, soft-bodied species such as mites, centipedes and millipedes. A small amount of glycerol is added in the solution to prevent insect specimens from becoming brittle.

Precautions:

1. Use only in a professional laboratory environment by personnel with experimental operation experience.
2. This product is a laboratory research-use reagent for scientific experiments only. It must not be used for human-related purposes, clinical diagnosis, food or household applications.
3. Keep the operating environment well-ventilated and avoid inhaling volatile substances.
4. Take adequate personal protection during operation. Avoid direct contact with skin, eyes and mucous membranes.

Product Information

Item	Details
Synonyms	Carl's Insect Fixative Carl Fixative Carl's Fixative
CAS	3047612-66-5
Specifications & Purity	BioReagent
Stability And Storage	Store at room temperature long term (12 months).
Storage	Room temperature
Shipped In	Normal
Application	Insect Tissue Fixation and Preservation
