

Catalog # C281473 9-(2-Carboxyphenyl)-2,7-dichloro-4,5-bis[(2-picolyl)(pyrazin-2-ylmethyl)aminomethyl]-6-hydroxy-3-xanthanone
ZPP1

Ligand used for quantifying biological zinc via a modified Zinpyr fluorescence sensor.

Technical Notes:

1. High concentration of zinc in sub-retinal epithelial deposits.
2. New strategy for quantifying biological zinc by a modified Zinpyr fluorescence sensor.
3. A novel imaging approach for early detection of prostate cancer based on endogenous zinc sensing.
